

Christopher Kobar

I love sharing the product of my imagination with others to make their lives more enjoyable.

Oracle

Sr. Principal UX Designer

2016–Present, remote

I am the lead designer for Oracle's next-gen mobile Expenses app, strengthening the Oracle brand by leveraging the Redwood design system to deliver a buildable product that our user's love. I have increased and enhanced collaboration with cross-pillar product, engineering, research, and policy teams, enabling advances in mobile interaction and AI-driven innovation that elevate the enterprise experience for our discerning customers and end users.

Most of all, I've been lucky to work with and learn from many amazing people that helped me play a key role in the strategic design of Oracle CX Service, My Oracle Support, and Oracle Advanced Services Portal.

CSRA

Sr. UX Designer

2012–2016, Washington, DC

I led the design of numerous mission-critical applications for the Administrative Office of the US Courts. As a trusted advisor to product owners and engineers, my efforts enabled the federal judiciary to overcome significant hurdles posed by a fast-changing digital landscape, empowering pretrial staff, judges, probation officers, law enforcement to better accomplish their respective missions. I designed new tools for offender sentencing, officer training, and tracking violent crime, and contributed to notable enhancements in case management and documentation applications.

Arlington County Government

Enterprise Information Architect

2009–2012, Arlington, VA

As the county's lead UX designer, I was responsible for the public website, employee intranet, and numerous departmental and special-purpose sites and applications. I drove the transition from outdated portal products to a modern CMS, created the first mobile apps, and introduced new experiences for building permitting, property assessments, and county payments. As a county resident, I loved improving the relationship between people and government, and never hesitated to find digital touchpoints that I could help improve.

Pointe Technology Group Information Architect

2006-2009, Arlington, VA

Kaseman Corporation Information Architect

2005-2006, Washington, DC

Information Innovators Inc. Information Architect
